

HBF Health

As WA's leading health fund we have been helping Western Australians access the best possible healthcare for nearly 70 years. We are one of WA's highest profile member-based organisations and today have almost 900,000 members, the great majority of them West Australians.

For over 20 years HBF has also provided members with a range of general insurance products in addition to health insurance. In 2011 we achieved a milestone when, for the first time, we paid over a billion dollars in health benefits and general insurance claims to our members.

In an era when the health insurance sector is increasingly dominated by large, for profit insurers, we believe our not for profit status is vital in enabling HBF to deliver the best possible value to our members who are our most important stakeholders.

Our vision is that HBF will lead the way in improving the health and wellbeing of West Australians and our promise to our members is that they will receive the best personal experience possible.

Putting members first
